

# Using LED for Emergency Management

Heath Hayward  
Geographer – LEHD Program  
U.S. Census Bureau

2009 LED Annual Workshop  
March 5, 2009

# What Makes LED Relevant?

- Timeliness of Data
- Geographic Specificity
- Free to the Public
- Available 24/7
- Convenient Data Access
  - Innovative Tools
  - VRDC Download

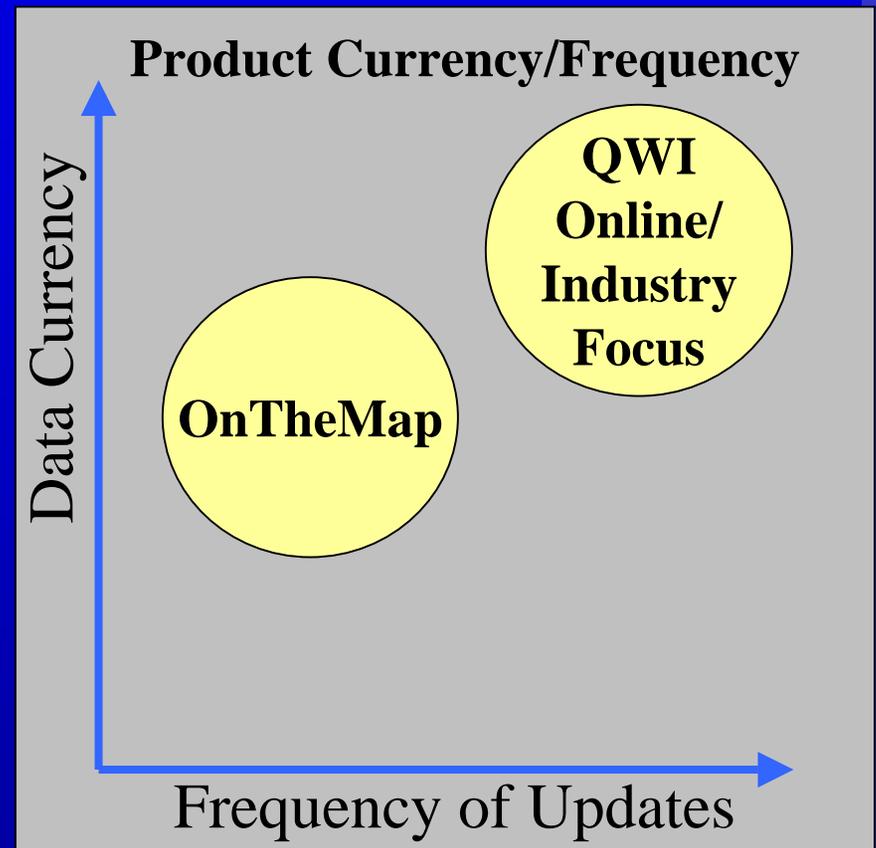

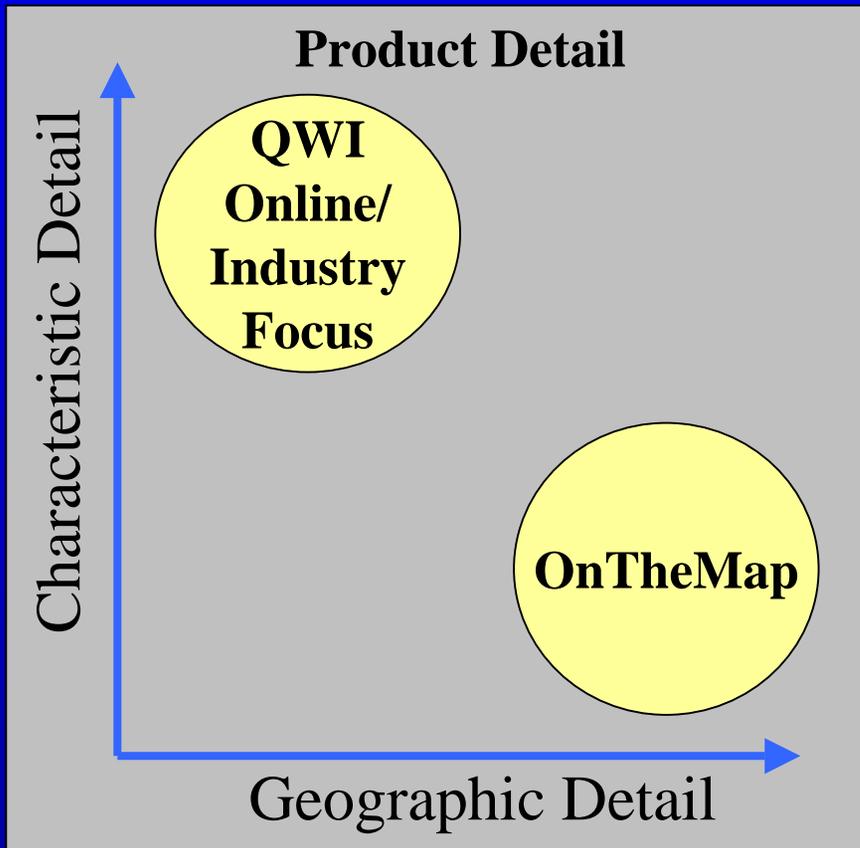

# OnTheMap

LED's online dynamic mapping and reporting tool

UN recognition as major U.S. statistical innovation

- ✓ Where do workers live?
- ✓ Where do residents work?
- ✓ Reports on age, earnings, and industries
- ✓ Segment an analysis by age, earnings, or industry
- ✓ 46 states online
- ✓ 2002-2006 annual data
- ✓ User-selected areas based on Census Block units
- ✓ Innovative disclosure protection

# QWI and OnTheMap for Emergency Management

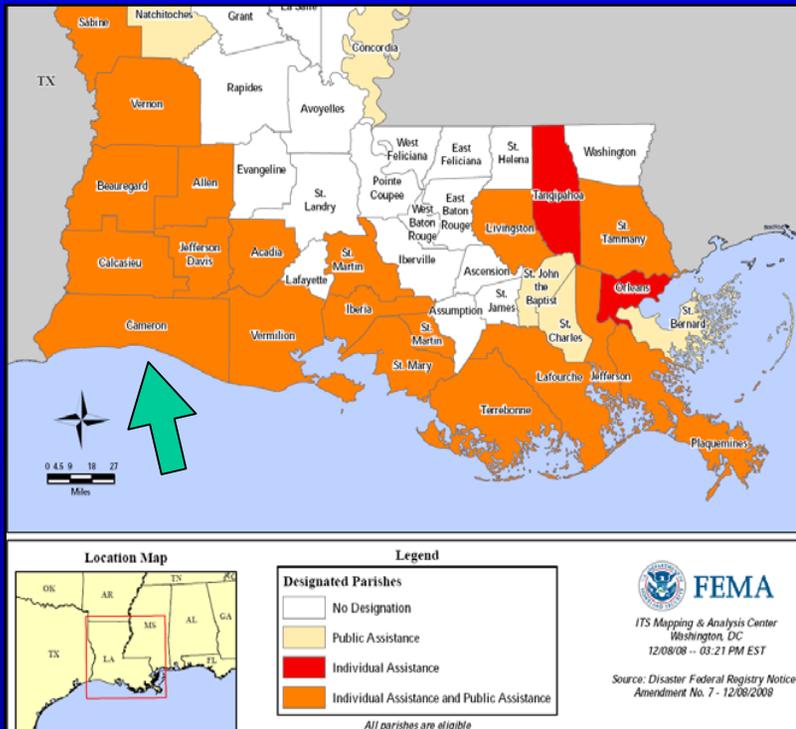

# Using LED to Assess a Disaster's Impact on Workers and Jobs

## Some Examples:

- Louisiana FEMA Disaster Areas
- A bridge collapse in Minneapolis
- Hurricanes in the Gulf Coast
- A tornado touches down in Missouri
- Wildfires in California
- Flooding in Iowa

# Using QWI Online: Detailed Characteristics

- Less Precise Geography → More Precise Characteristics and More Current Data
- FEMA Disaster Areas are Counties

## QWI Online [NAICS]

## Work Area Profile Map

- Shows where workers employed in the selection area work.
- Projected path of Hanna based on NWS data.
- Plume selection from 20 miles to 150 miles.
- Approx. 3.9 million jobs in this selection for 2006.

The north arrow points to 'true' or 'pole' north. The centerpoint of the map is used for this calculation.

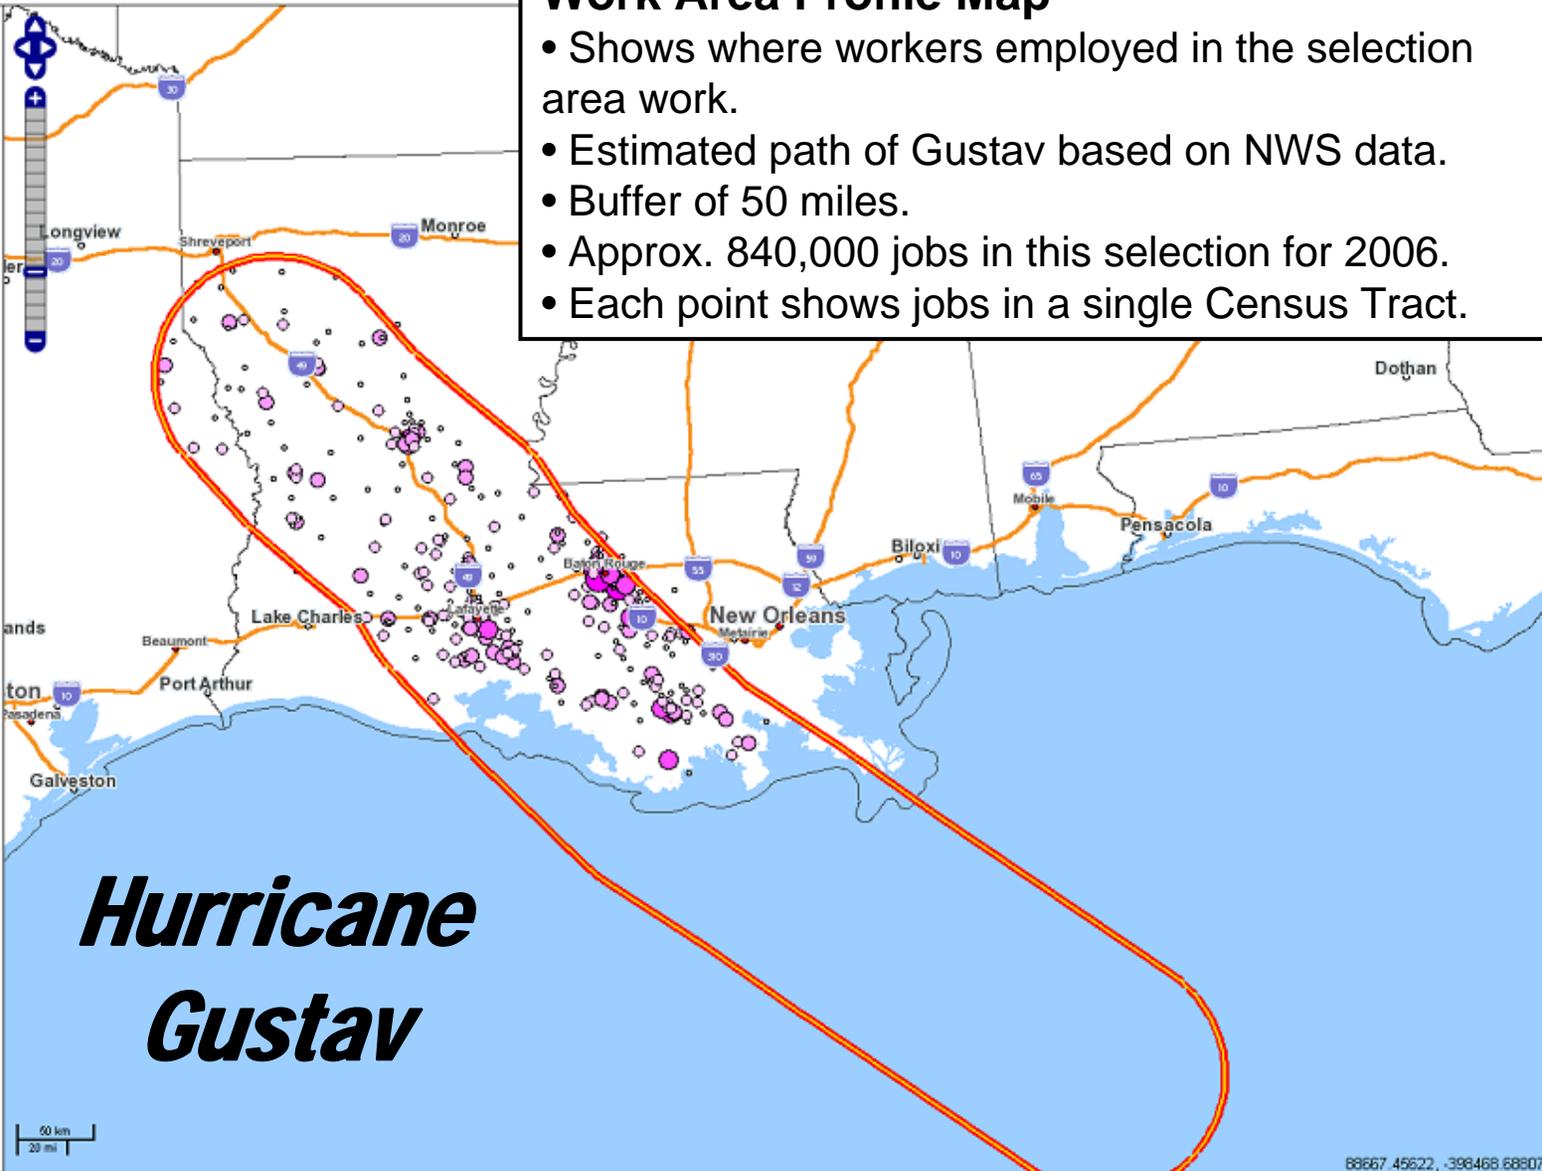

Scale  
0 26 52 78 104 mi

The scalebar is calculated as an average over the entire map and is not survey accurate, especially at large scales.

- Legends**
- City, Population 50,000-100,000
  - City, Population 100,000-250,000
  - City, Population Greater Than 250,000

- Primary Selection Area**
- 98 - 780 Workers
  - 781 - 2635 Workers
  - 2636 - 6247 Workers
  - 6248 - 12201 Workers
  - 12202 - 21084 Workers

- Participating State**  
 ■ Participating State  
 ■ Non-Participating State

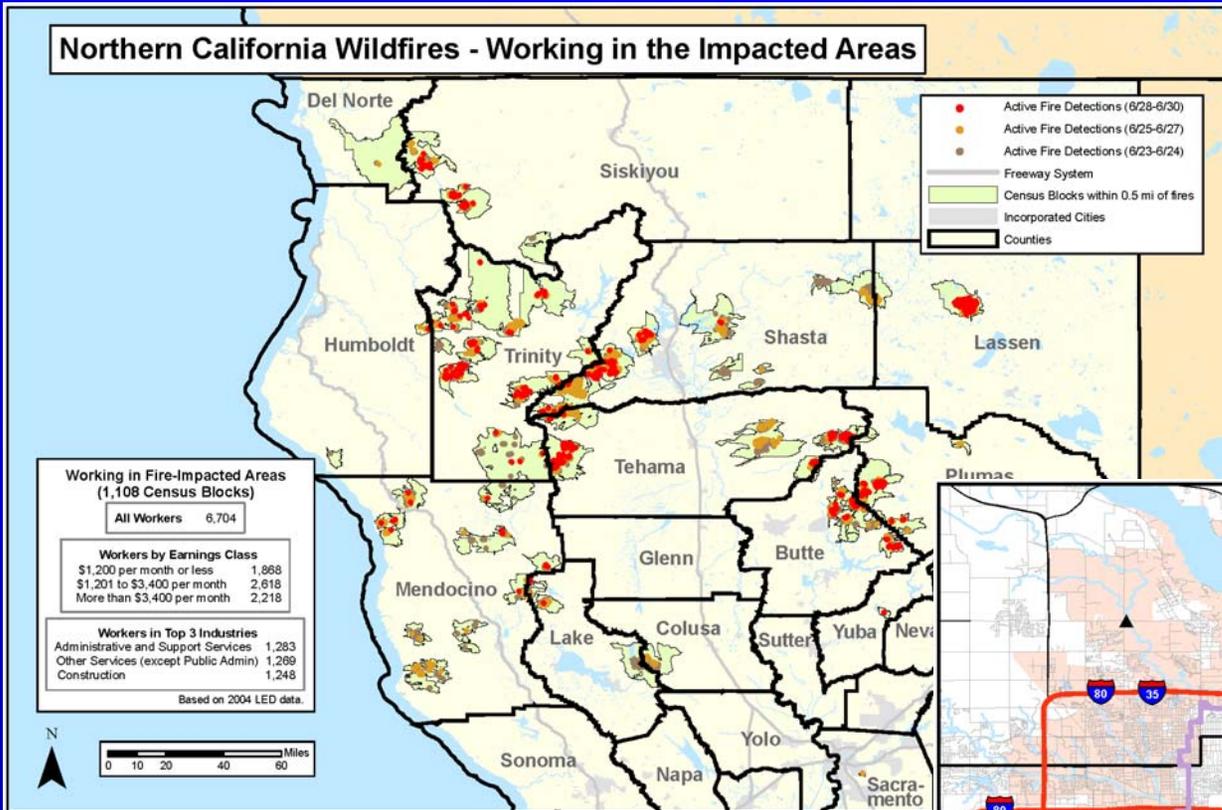

# Hurricane Gustav

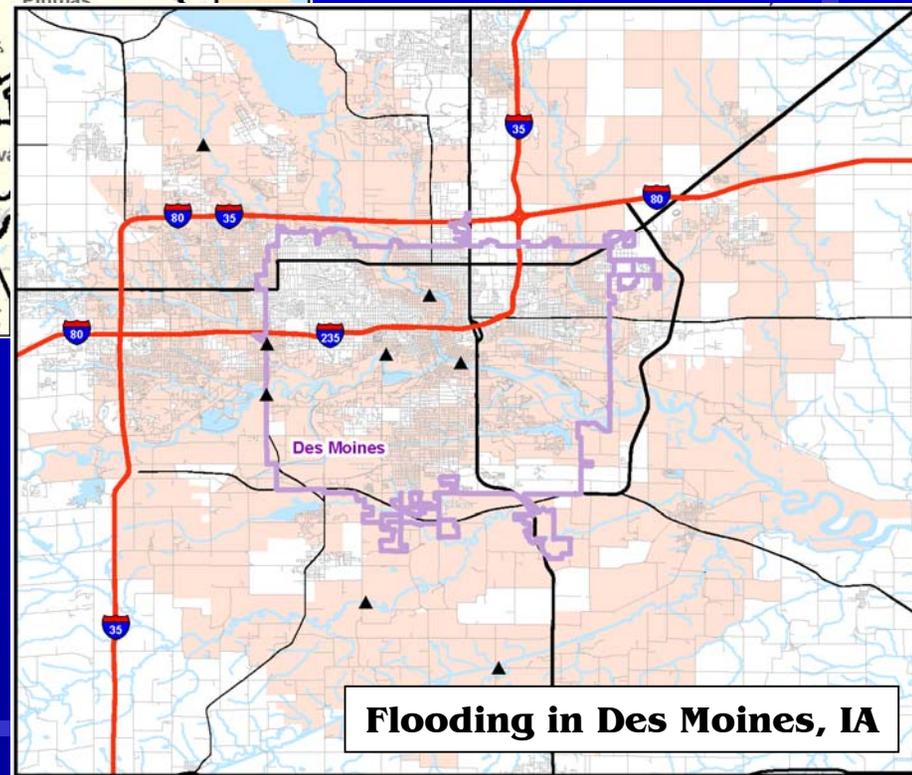

## Work Area Profile Map

- Shows where workers employed in the selection area work.
- Estimated path of Gustav based on NWS data.
- Buffer of 50 miles.
- Approx. 840,000 jobs in this selection for 2006.
- Each point shows jobs in a single Census Tract.

# Using OnTheMap's Raw Data from VRDC

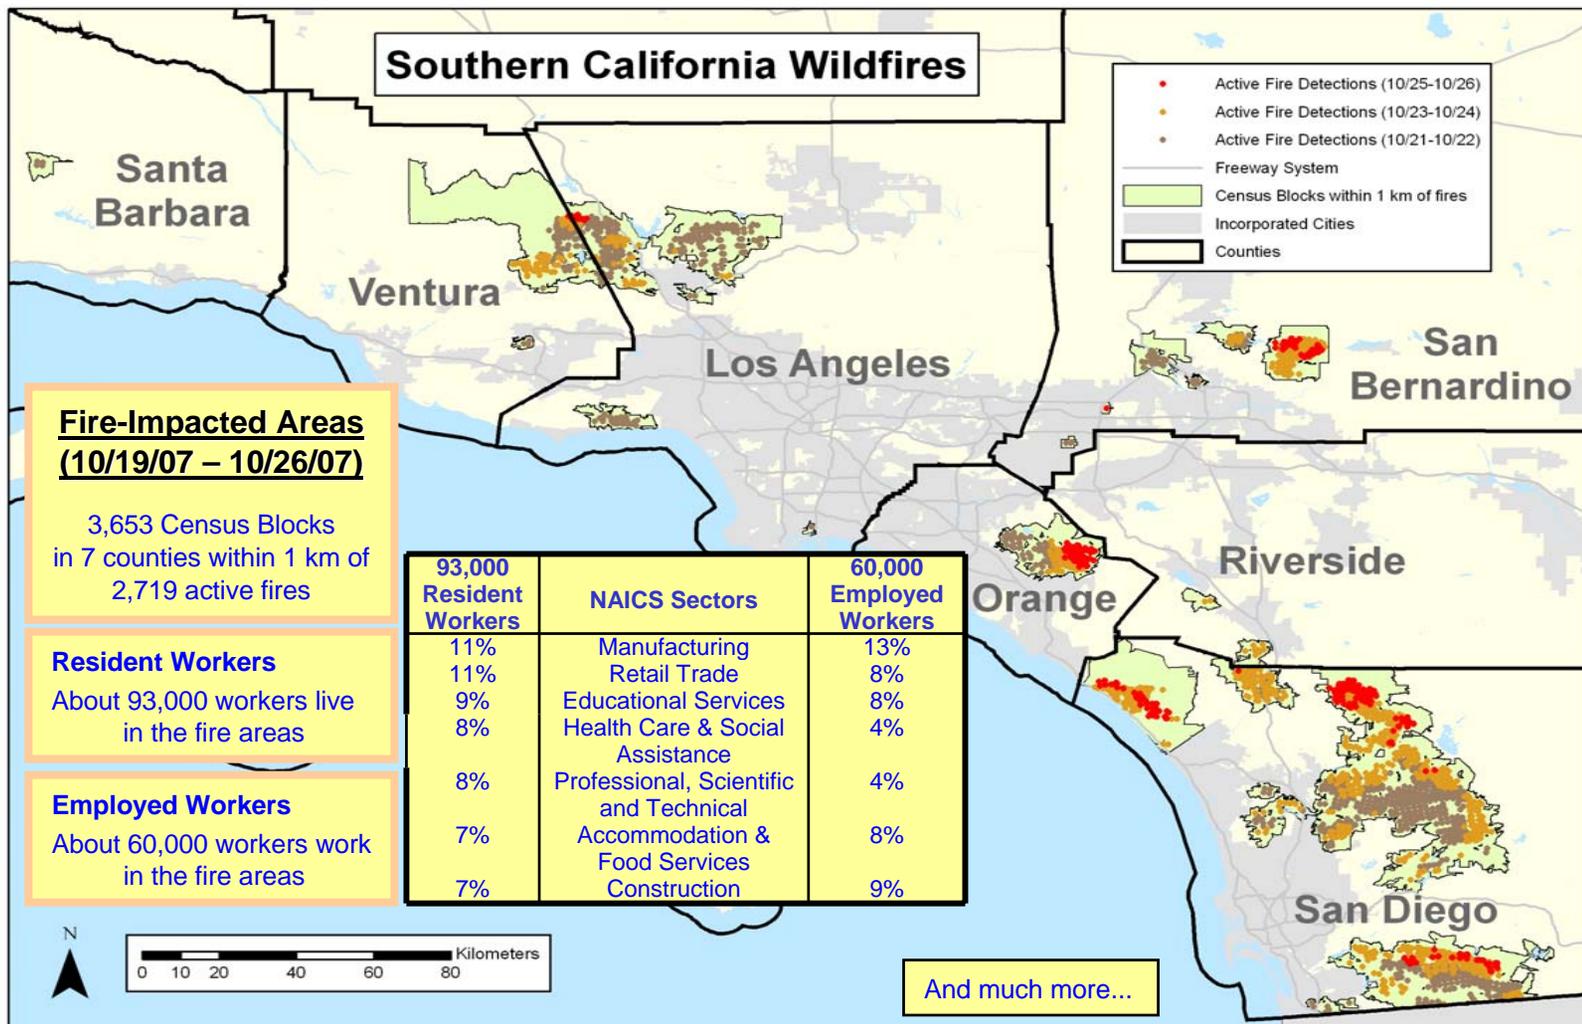

How do you analyze non-contiguous areas together?

- TIGER/Line Shapefiles
- Raw OnTheMap Data (VRDC)
- Disaster Reference Data
- GIS Software
- Statistical Software

Size matters—make sure  
your software can handle  
thousands of rows of data

# Emergency Management and OnTheMap Version 4

- Greater interoperability with other analytical and data visualization software
- 46+ states online
- Additional years of data – 2002-2008
- Released in December of this year

# Conclusions

- LED data can be applied in preparing disaster readiness plans AND disaster recovery plans
- Best used in combination with disaster-specific data (FEMA, USGS, NOAA) and ***local knowledge***
- Utility of LED will continue to grow with expanded data coverage and development of new variables
- We are not emergency planners, so feedback and insight from professionals in the field is crucial both in terms of:
  - Design of the LED tools (OnTheMap and QWI Online)
  - Content of the LED Dataset (useful new variables)
